Item description

The 500ML Lighting Control Console from Strand Lighting is designed to operate dimmers, LED fixtures, and moving lights. The 8" TFT color touchscreen allows for fast set up, while backlit command buttons make it easy to use. The unit has one external DVI port to add a touch monitor for more control.

In addition, the 500ML console features four universes for a total of 2048 channels, and 24 faders.

Each may be used as a Master, Sub Master, or as a Playback control. Equipped with backlit Play, Pause/Reverse, and Bump buttons, they allow cue stacks to be triggered as required. Using industry standard methods of control, the user interface is easy to learn, allowing the operation to appeal both to the casual and professional operator alike.

LCD fader bank information screens

Supports 3-pin XLR desk lamps

CE marked
