

SPORTS FIELD LED LIGHTING INSTALLATION

BADRY SLS is experienced in transforming expensive traditional football stadium lighting fixtures into cost-efficient, crisp LED lighting systems. We serve the Egypt & Middle East area, so we understand how important those bright lights are during night football games. We will work with you to provide industry-leading LED lighting installations that will make every football game experience special.

Benefits of Switching to LED Lighting

We have years of experience in designing and developing unique LED lighting solutions for football stadiums. Based on a modular architecture, the fixtures can replace traditional HID luminaires from 400W to 2000W with crisp 4000K or 5000K moreover 6500K, light in a choice of either 70 or 80CRI minimum.

We also provide the highest level of glare control available in LED FLOOD lighting installations. These high-quality fixtures use a special optic holder that control glare on the diode level. This upgrade improves customer experience by allowing spectators and photographers to capture high-quality action pictures on the field that aren't usually an option. Also, the LED lighting installation will be less demanding on the eyes of people in the stadium, therefore, increasing the quality of the playing field.

Why BADRY SLS ? (1)

Let BADRY SPORTS Lighting Solutions (BADRY SLS) helps you take your football or sports stadium to the next level by installing our industry-leading LED lighting system. We provide and install custom LED lighting solutions. Call us today at +20-2-219-06-401 or contact us online or via e-mail SLS@badrygroup.com and we will provide you a free consultation.

LED LIGHTING INSTALLATION

BADRY SPORTS Lighting Solutions (BADRY SLS) provides professional, efficient LED lighting installation services for Sports properties.

With years of experience, our team has the expertise to install your LED lights. Whether you need LED lighting installation in a stadium, playground, court, or a club, BADRY SLS is the preferred lighting contractor in Egypt and North Africa.

Before Installation

Installation is the final step in the lighting process. First, we complete a free, thorough assessment of your property to determine a tailored lighting plan. Once the plan has been approved, BADRY SLS creates a custom lighting design. After these two stages are complete, we install the chosen LED lights.

During Installation

During installation, BADRY SLS's team of licensed commercial electricians will remove the current lighting, install the new LED lights, and perform tests to ensure the lighting is installed correctly. We follow all codes to upgrade or replace wiring and fixtures.

After Installation

Once the LED lighting is installed, your energy savings have begun. LED lights significantly reduce operational and maintenance costs help reduce waste and protect the environment, and they look great. Talk about a win-win!

For more information on LED lighting installation for your sports property, contact BADRY SLS today!

SPORTS & ARENA LED LIGHTING

For your Sports lighting needs, come to BADRY SLS! We are experienced in transforming and upgrading costly traditional court lighting systems to energy-efficient LED sports lighting systems. We have years of experience in designing and developing unique LED lighting solutions for the sports arena. From tennis courts and football stadiums to basketball courts and gyms, BADRY SLS will offer you best price and the highest quality LEDs so you can save money and energy.

In the past, re-lamping traditional sports lighting was extremely costly and frequent; however, with our LEDs, you will not need to worry about re-lamping ever again. LED lights not only brighten the playing surface, but it also reduces maintenance costs and energy usage. Installing high efficiency LED fixtures also provides a more uniform distribution of light, which makes sporting events safer and more enjoyable.

OUTDOOR SPORTS LIGHTING

INDOOR SPORTS LIGHTING

UPGRADE TO ENERGY EFFICIENT LED COURT LIGHTING SYSTEMS

With our sophisticated lighting design software, we can show you how much energy YOU can save with LED lights. We compare the amount of foot candles you currently use to the much lower amount LED luminaires would use. Innovative sustainable energy solutions, such as outdoor LED sports lights, are made possible through our fair prices and rebates, such as the CenterPoint Rebate. Contact us online and we will provide you a free consultation on LED lighting solutions for your court, field, gym or sports venue.

Update Your Sports Lighting Today!

STADIUM & FIELD LIGHTING

FOOTBALL, BASEBALL, HOCKEY, LACROSSE, TRACK, GOLF, TENNIS

We specialize in LED lighting for outdoor fields and stadiums. Whether it's Baseball, Football, Soccer, Softball, Lacrosse, Auto Track, Golf, Tennis, or Track and Field, we will work with you to provide the highest quality lighting from the best manufacturers.

LED Lighting Applications for Stadium & Field Lighting

Our process starts with an initial assessment of your facility which allows us to determine the existing energy usage and potential areas for improvement. We then provide a detailed design using photometric software. Our team of installation professionals will install the desired system and we offer ongoing maintenance and service for the life of the system.

The fixtures we recommend are designed to provide our customers with high quality and efficient lighting over an extremely large range of wattage and outputs. Based upon a modular architecture, the fixtures can replace traditional HID luminaries from 400W to 2000W with crisp 4000K or 5000K light in a choice of either 70 or 80CRI minimum.

We also provide the highest level of glare control available in LED flood lighting to date. Rather than control the glare at the luminaire level with external visors or baffles, the fixture uses a unique optic holder that controls glare on the diode level. Unlike a competitive product that utilizes external visors or other methods of partial shielding, our fixture shields view of the glare source from all viewing angles.

Why Switch to LED?

Sports lighting is a unique lighting challenge unlike any other type of lighting. Making the most of the LED fixtures requires knowledge or proper pole locations, mounting heights, beam selection and aiming strategy. BADRY SLS provides engineering support and lighting design to all of our current and future clients. Let our team of experts take your stadium lighting project to the next level!

Why BADRY SLS ? (2)

Our turnkey services set us apart from the competition. Our in-house design team, account managers, installation professionals, and maintenance team will work with you from start to finish. We source high quality products backed by the top manufacturers in the world. If you are looking for a new installation or to retrofit your sports lighting to LED, Contact us today.

We understand the rules and regulations that come along with football field lighting and will make sure that we're designing within those guidelines. BADRY SLS has the proper knowledge required for proper pole locations, beam selection, mounting heights, and aiming strategy. Our team will be inconsistent contact with you to ensure that we are on the same page as we take your football field to the next level by providing industry-leading LED lighting installations. We provide and install custom LED football field lighting solutions all over Egypt. Give us a call today at Contact us online for a free consultation.

FOOTBALL FIELD LED LIGHTING INSTALLATION

BADRY SLS has years of experience in providing excellent soccer field LED lighting installations in Egypt! Whether you're looking to upgrade your current lighting fixtures or installing a LED lighting system for a brand-new stadium, BADRY's team of experts are happy to help your vision come to life!

Football field applications:

- Parks
- High School
- College
- Indoor
- Recreational Centers
- Training Centers

We provide the highest glare control floodlighting available. We want to make sure that our innovative installations are increasing your venue's ticket sales and customer experience that is unforgettable. Our football field LED lighting fixtures are designed to provide efficient lighting for a large range of wattage and outputs. These fixtures can replace traditional HID luminaries from 400W to 2000W with sharp 4000K or 5000K light in a choice of either 70 or 80CRI minimum.

Lighting Design

BADRY Sports Lighting Solutions offer a complete lighting design service, provided without charge, using the latest equipment operated by experienced lighting engineers and designers. With our unique lighting design software and CAD equipment we are able to produce highly finished lighting schemes.

The average lighting levels shown on our lighting designs are GUARANTEED. Experienced designers with knowledge of the customer's requirements and the capabilities of the luminaires he has to choose from are the backbone of our design section.

Our design service has been used by many of the Egypt's foremost architects and consulting engineers and by national and local Government departments throughout the world.

Many projects involving the design of structures to carry many different items in areas subject to typhoon, arctic conditions or at sea, have been successfully completed by our engineers

Our design and development engineers are experienced in the design of special luminaires and columns. Modern high tech designs or the reproduction of lanterns in historic areas are projects regularly undertaken. Our products are tested in our own laboratory; photometrically, thermally and to determine their IP rating.

A full lighting design service can be part of a turnkey package or simply a design and supply offer. BADRY SLS has a team of experienced lighting designers who deal solely with outdoor lighting projects, be they road lighting, floodlighting, stadium or high mast lighting

BADRY SLS is devoted to outdoor lighting. The preparation of outdoor lighting schemes requires input from the client as well as the designer and the information we require to provide a scheme includes:-

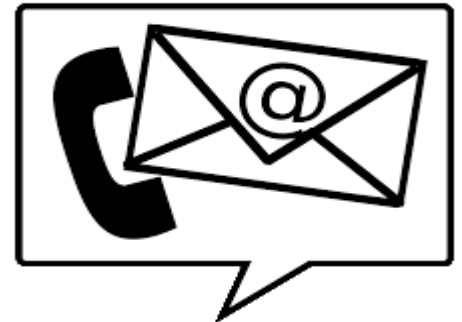

1. A drawing of the area - in DXF or DWG format (other formats may be possible) - or a clean hard copy with scale. If a particular section only is to be lit or different illumination levels are required for different areas this should be shown.

2. If there is a contribution from existing lighting to be included this should be identified and detailed.

3. The specification - Is there a particular standard to be complied with? If no specification is received, we will use US or European Standards should they exist or the relevant Sporting Association or National Authority's own specification

3. Is there any overriding design requirement? Should a particular type of luminaire or lamp be used? Is there a height limitation? Are column or bracket positions fixed? Is the area subject to any hazardous area or explosion proof regulations? What type of mast/column is required for access and maintenance?

Armed with this information, we will work with you to achieve a lighting scheme to meet your requirements.

High Mast Installation

High Mast lighting is the most efficient method of lighting large areas with the minimum number of obstructions. BADRY is, one of leaders in High Mast lighting, has achieved that distinction by continuous development, investment and innovation. Our experience is unequalled in the number of High Masts we have made and the many different situations in which we have installed them over the past 20 years.

BADRY SLS offers customers who require it, a turnkey package. We will design the lighting scheme, check that all equipment to be supplied conforms to the specifications, design and arrange the installation of the foundations, design and install the electricity supply, manufacture the High Masts and luminaires, deliver the equipment, install the equipment and commission the equipment to confirm that the specification has been achieved.

BADRY SLS supply and install High Masts throughout Egypt and where our customers need help, we can supply personnel to supervise the local operatives undertaking the installation and commissioning of High Mast schemes or offer a total installation package.

Sports Lighting

For over 20 years BADRY SLS has been providing sports lighting solutions for recreational and prestigious sports facilities throughout the world.

We have a specialist service available for all levels of sports lighting from our in-house Sports Lighting Division.

Our Sports Lighting Package Includes:

- A dedicated project manager providing a single point of contact
- A complimentary sports lighting design service
- An installation package with modules which can include: ground works, cabling, supply, installation, reinstatement and a final test and commissioning of the system
- Highly competitively priced packages assuring quality as well as value for money
- Tailored maintenance packages delivering the aftercare required to ensure the longevity and performance of the installation
- Training for local maintenance is also available
- All our sports lighting products are designed and manufactured within highly qualifications & Standards.

Contract Services

BADRY SLS Contract Services are the market leaders in the design, supply, installation and maintenance of High Mast lighting for large areas and sports facilities. BADRY SLS undertakes contracts worldwide, working closely with numerous large organizations' including airports, port authorities, highway authorities, rail networks and sports clubs.

BADRY SLS LED products offer an innovative and energy saving solution to HID lit area and highway lighting projects. We design; supply and install LED upgrade packages for existing projects to save energy and cost.

BADRY SLS believe Health, Safety and the Environment are paramount across the breadth of the operations undertaken by our teams. All activities are carefully assessed by fully qualified managers and supervisors using risk assessments and method statements.

Our project management includes full turnkey solutions or packaged modules.

BADRY SLS operates an Environmental Management System which complies with the requirements of ISO 14001:2004 for the testing and manufacturing, management of installation work, inspection and maintenance of exterior lighting. The system aims to recognize and reduce the impact on the environment.
